

### **COVID-19 Testing Task Force Lab List**

The Testing Task Force is working to ensure that Californians who need COVID-19 testing have access to tests. As part of this effort, the Testing Task Force is maintaining and publishing a list of labs that have met all criteria for readiness and can receive samples for RT-PCR COVID testing.

The objective of this list is to provide information on available capacity across the state. Lab capabilities are listed as a reference to help identify labs providing services in need.

4 criteria are used **to screen for readiness:**

- Lab has obtained a California clinical laboratory license and a CLIA certificate for high or moderate complexity testing (depending on test categorization)
- Lab is running FDA EUA RT-PCR, other molecular, or antigen-based tests approved for clinical diagnostic use
- Lab is [registered with LFS for COVID-19 testing](https://arcg.is/1qOWjb) (arcg.is/1qOWjb)
- Lab is submitting data to CalREDIE (either via ELR or .csv)

**Please contact your local health department for public health laboratory testing for any of the following use cases:**

- Hospitalized patients with symptoms consistent with COVID-19
- Persons identified for testing by public health contact investigations and disease control activities in high risk settings
- Screening of asymptomatic residents or employees of congregate living facilities (e.g., after positive cases have been identified in a facility)
- Other individuals with symptoms consistent with COVID-19

Contact information for each local health department can be found on the [CDPH website](https://www.cdph.ca.gov/Programs/CCLHO/Pages/LHD-Communicable-Disease-Contact-List.aspx) (www.cdph.ca.gov/Programs/CCLHO/Pages/LHD-Communicable-Disease-Contact-List.aspx).

A list of labs for **other testing needs** (e.g., routine healthcare facility testing, occupational health testing, etc.) are provided below. Please note, your local hospital or health system may also be able to process COVID tests.

Labs can provide a variety of test-related services. Capabilities associated with each lab are defined as follow:

- **Full service:** Lab can provide onsite/offsite sample collection (including supplies like PPE and sample collection kits), facilitates logistics to collect and process specimens, and conduct diagnostic testing
- **Enhanced service:** Lab can provide sample collection kits, manage inbound logistics (e.g. preprinted shipping labels), and conduct diagnostic testing
- **Testing only service:** Lab can conduct diagnostic testing. Submitter must supply their own collection kits

This list is being refreshed on an ongoing basis. If your lab would like to be represented on this list or if you would like to update your lab's information, please complete [this form](https://arcg.is/1qOWjb) (arcg.is/1qOWjb).

Please reach out to CA Testing Task Force ([testing.taskforce@state.ca.gov](mailto:testing.taskforce@state.ca.gov)) if you have any questions.

### Additional COVID-19 Testing Laboratories

For COVID testing not covered by your local health department (e.g., routine healthcare facility testing, occupational health testing, etc.), below are additional labs available.

Updated as of 7/16

Lab Name	Contact	Location	Type of specimen collected*	COVID testing service capabilities		
				Full service: Lab can provide onsite/offsite sample collection (including supplies like PPE and sample collection kits), facilitates logistics to collect and process specimens, and conduct diagnostic testing	Enhanced service: Lab can provide sample collection kits, manage inbound logistics (e.g. preprinted shipping labels), and conduct diagnostic testing	Testing only service: Lab can conduct diagnostic testing. Submitter must supply their own collection kits
Neoanalytics Laboratory	<a href="mailto:rona@neoanalyticslab.com">rona@neoanalyticslab.com</a>	Alhambra, CA	N/A	YES
